

Blackberry Team Lead | Full-Time

DESCRIPTION

The Voalte solution consists of the Voalte Server, which runs in a UNIX environment and the mobile application running on a device such as the Blackberry Curve.

We are looking for an experienced Blackberry developer with agile development and leadership skills to join our company. The responsibilities would include working with an outsourced team of Blackberry developers to complete the Voalte mobile client application. Which needs to communicate with the Voalte Server and a BES server to receive push notifications while the device is asleep. Also to integrate with client BES servers in an enterprise Wifi network. Any VoIP experience a huge plus.

TECHNICAL REQUIREMENTS

- 7+ years of team-based software development experience
- 3+ years of solid demonstrable experience developing software for Blackberry in Java
- Networking knowledge and development experience
- Leadership skills to be a team leader
- Comfortable in an agile development environment with highly interactive team
- Proven scrum master a plus
- BES experience with push notification to custom application
- Worked with an outsource resource
- Any VoIP on BlackBerry a huge plus
- Conducts detailed design, coding, testing, code reviews and documentation, as required in the software development process

OTHER SKILLS

- Self-motivated, entrepreneurial and team player
- Excellent oral and written communication skills
- Work with technical and non-technical team members
- Driven by strong work ethic and desire to excel - not just a paycheck
- Ability to take initiative
- Realistically positive can-do attitude
- Ability to deliver on-time

VOALTE OFFERS A COMPETITIVE BENEFITS PACKAGE THAT INCLUDES

- Paid medical, dental, and vision insurance coverage
- Monthly employer contribution to a Health Spending Account (HSA)
- Employee Stock Options
- Paid Vacation and Personal Time
- Relocation Bonus

ABOUT VOALTE

Voalte designs, develops, markets, sells and supports innovative healthcare solutions for the emerging class of highly mobile computing devices. Our first product, Voalte One, will be deployed on Apple's iPhone and is designed as a holistic, turnkey, communication solution for hospitals.

MISSION STATEMENT

Voalte provides compelling software solutions for healthcare institutions that solve communication problems at the point of care. We believe that better, more efficient communication improves clinical performance, which in turn improves patient care, safety, and satisfaction.

Our products are designed to be intuitive, high value, mission critical applications deployed on the latest generation of touch-based smartphones. We provide an exceptional end-to-end customer experience. We do it better than anyone else, and we spend our time thinking about ways to improve this experience.

**BETTER COMMUNICATION MEANS BETTER CAREGIVERS.
BETTER CAREGIVERS MEANS BETTER PATIENT OUTCOMES**

OUR FOUNDING TEAM

Rob Campbell - President

Rob Campbell can best be described as a start-up specialist. A product of Silicon Valley, Rob worked as a Marketing Director for both Apple Computers' Steve Jobs, and later for Microsoft's Bill Gates. He has founded more than five companies, including ForeThought, Inc—developer of the highly successful PowerPoint and FileMaker application software products. Rob has a wide variety of experience in new venture creation and serves as an Entrepreneur in Residence and on the Board of the Center for Entrepreneurship and Innovation at the Warrington School of Business at the University of Florida.

Trey Lauderdale - Vice President of Innovation

Trey, a graduate of the University of Florida's prestigious Masters of Entrepreneurship program was previously the Area Sales Manager at Emergin Systems. At Emergin, Trey distinguished himself as the top revenue producer for the company. In fact, at the time of his departure in August 2008, Trey accounted for nearly 50% of the Company sales. Prior to graduate school, Trey worked for Siemens Energy and Automation and was a member of their Fast Track Sales Development Program.

Benjamin King - Chief Technology Officer

Benjamin King holds a degree in Electrical Engineering and a Masters of Science in Materials Science from Georgia Tech. He worked for 5 years for CardioMems, Inc in Atlanta as the Company grew from 3 employees to more than 150. Benjamin most recently has served as a web developer and software guru for DemandEO, Inc in Orlando. He is a certified iPhone developer and has programmed in numerous languages on platforms from the Mac and Unix to the Web.

Oscar Callejas - Vice President of Services

Oscar Callejas holds two business degrees from the University of Miami and a Masters of Entrepreneurship from the Warrington School of Business at UF. Oscar has managed several South Florida hotels and has overseen their acquisition and historical restoration. In addition to hospitality management, Oscar is experienced in rich-media graphic design, web development, and marketing communication. He has served in a variety of positions in the hospitality industry where he developed his skills in service training and management.
